1 Overview

Not much is known about GOSI-TRA due to the non-linear time-frame in which the organisation operates. GOSI-TRA or colloquially know as the Time Reconstitution Association ([See addendum 1] on information collected from OBJECT-9) is a multi-timeline [See addendum 2] governing entity which acts with the sole purpose of keeping the multiuniversal timelines "corrected". The corporation currently holds a vague understanding of the criteria of a correct timeline, but from documents retrieved from OBJECT-9, the following specification has been sourced: there are 3 major factors in the correctness of a timeline:

- Error deviation (from the master sequence)
- Flux rate
- Shift
- Zero point space constant

Fig. 1. GOSI-TRA's logo found on all documents within OBJECT-9

The research team is currently looking into the definition of zero point space, however this is likely undiscovered physics the Corporation of the present is unaware of. Other information gathered from OBJECT-9 pointed towards the TRA's awareness of anomalies, and specifically the Corporation's efforts in containing them. It can be assumed that the Corporation,

or a version thereof, exists in numerous timelines, if not all. Although, documents from OBJECT-9 hint at the TRA being created by a future version of the Corporation, wherein the interests of the Corporation may have shifted given an substantial increase in technological and time-space traversal abilities. This cannot be proven beyond any reasonable doubt. The TRA has appeared to have achieved complete traversal[1], whilst the Corporation currently remains at incomplete traversal[2], given a non-anomalous means of traversal that remains sourced from our home timeline. Use of OBJECT-9 is presently RESTRICTED. No testing is planned and OBJECT-9 will remain in High Security Storage Centre Omega-3 indefinitely.

GOSI-TRA has weapon technology vastly beyond anything the Corporation has recorded. Due to the few recorded instances of interactions with the TRA, the Corporation is currently unaware of the full extent of the TRA's technology. The research team has recommended to mark the TRA's technology as LIMITLESS for now. Recorded combative tools used by the TRA include firearm-like implements, though unlike the firearms we know of, these firearms have been recorded to instantly disintegrate anything in line of sight; regardless of composure, anomalous properties, size, or any other physically based constraints. It must be assumed that these firearms can and will erase anything from existence. Obtaining one of these would greatly aid the Corporation, but is likely impossible. TRA agents appear dressed in black plate like armour when visible. Their armour is able to phase out of sight with ease, but unlike a sort of invisibility cloak, hidden agents do not appear to interact with matter. TRA agents are seen to enter target locations using door like wormholes, referred to as simply "Time doors" in document OBJECT-9a. The Corporation believes the TRA to have a peculiar 1990s aesthetic within wherever the TRA's main base of operations is. This assertion was made as the paper in the documents within OBJECT-9 were carbon dated to the 1990s; insinuating that the past through the "Time doors", and presumably in the TRA's HQ, time does not flow in any conventional sense; and it remains the 1990s constantly. The observation team is looking into this notion.

2 Influence

GOSI-TRA's influence is immutable. The Corporation has no means in which to cease its activity nor monitor it. Most of the information on the TRA is both sparse and heavily classified. Nonetheless, a observation team has been assigned to GOSI-TRA in the hopes more information will be gathered in the future. OBJECT-9 was the first major breakthrough in GOSI-TRA's case file since the breach incident TRA-07 [See addendum 3].

3 Postscript

3.1 Addendum 1 - OBJECT-9

Fig. 2. OBJECT-9 in storage at High Security Storage Centre Omega-3

OBJECT-9 was a briefcase found on the corpse of OBJECT-1, a deceased TRA agent. OBJECT-1 was found in the [REDACTED] desert in [REDACTED] at [REDACTED] by field agent Jacob Nomes. It is believed that OBJECT-9 contains the Complete Time Traversal Mechanism formerly used by OBJECT-1. OBJECT-1's corpse was found severely charred and in some places completely torn off. The extraction team was able to pry the what remained of OBJECT-2, with some of the armour plating pieces disintegrating when removed. All of the intact pieces removed appeared non-functional. OBJECT-3 to 8 were particularly intricate to extract th. __. __. [CONTENT DELETED] __.erning the documents obtained from OBJECT-9, many were unrecoverable due to the [REDACTED] injury pertaining to OBJECT-1. The ones recovered have provided the Corporation with a substantial amount of information, and proved without doubt the TRA's existence. An extract from OBJECT-9c can be found below.

TRA Agent Handbook 5th Edition

...remember your checks. Any small disruptions to the Timeline can have exponential effects! Keep alterations to a minimum and stay assigned to the task.

Rule #16: Your Clocko-buddy is your friend! If your in a tight spot in the field, don't forget to dial up your clocko for help!

...

Rule #19: Never enter a situation alone. Always engage in at least twos ... we say in the TRA, there's plenty of time, but no time for screwing around!

...

Rule #65: Time distortion sickness is no joke! Always head to the nearest medical facility on returning from a more displaced mission profile!

OBJECT-10, an embroidered patch with the words "Rookie" and "First Profile" was also found on OBJECT-1. It is entirely unknown what happened to OBJECT-1 when it arrived in our timeline, or what killed it, but it is very likely it was under phenomenal circumstances given the advanced technology of the TRA. One perplexing notion is the fact that the TRA have not come to collect their missing agent, whether this was meant to happen according to the master timeline, or for other indiscernible reasons is unknown. This notion means the observation team must keep watch of OBJECT-9 24/7, in the likely case it is extracted by the TRA.

3.2 Addendum 2 - Timeline Theory

The Corporation's current understanding of Timeline theory is that there are numerous timelines, or universes adjacent to our own. Parallel universes if you will. This conjecture is directly spawned from Many-worlds interpretation of quantum mechanics, with there being the existence of an Ultimate Level 4 multiverse[3]. The implications of this notion is that every mathematically possible universe/timeline exists, without question, under different laws of physics. There may be a limit to the number of separate timelines, but this is beyond out current scientific capabilities of testing. The motives of the TRA, given this notion, is understandable. The multiverse may well be in chaos if not for the TRA, however, it is hard to place trust in one governing entity to oversee all of time. For now, the TRA will remain under observation, but in this case, the TRA are likely aware and in full control of our monitoring efforts.

3.3 Addendum 3 - Breach Incident TRA-07

Breach Incident TRA-07 occurred [REDACTED] at Facility 5. 6 TRA agents entered facility grounds at approx. 4:47pm, instantly appearing in the 4th hallway in the west wing. A skirmish quickly ensued between on-ground personnel and the TRA agents. The TRA agents preferred to use nonlethal options on staff members. After disabling all threatening staff members in the immediate vicinity, they continued down the hallway. They disintegrated S-0041, a Daemon level anomaly in transit on their way to cell block D which housed C-8384. C-8384 was a low threat, newly instated, Convict volunteer. Cell block D camera footage filmed C-8384 being extracted from the cell block through what we know now as Time Doors.

3.4 Definitions

1: Complete traversal is the term used to describe the ability to fully access one or multiple time streams from the start and end-points of said timelines(s).

2: Incomplete traversal is the term used to describe the ability to only access singular or multiple limited portions of one's home time stream; often with difficulty, single-trip journeys, or for short time periods.

3: Universe Classification. Max Tegmark's & Brian Greene's created various classifications for universes beyond the familiar observable universe. Max Tegmark's devised 4 levels of classification, and Brian Greene's provided 9 types of multiverses. Our universe must be contained within a Level 4 multiverse, one in which all possibilities are possible and all universes are separate entities.
