Memorandum: Stay away, at all costs

Classification Omega Daemon Stuia Safe Recondite Beneficial

Recontainment Measures Apokulupto Extensive Minimal Non-applicable

1 Specification

S-0060 is a 10-metre stretch of a wall located at Facility 17. It is unknown whether its physical properties are composed, or similar to areas in which its anomalous effects reside. For this reason, its composure remains unknown but is assumed to adopt the composure of its host material. The infected wall samples showed no substantial anomalous properties.

2 Containment Procedures

S-0060 has no exceptional containment procedures. After extensive observation, S-0060 appears entirely contained within Facility 17. Thus, it should remain installed on the grounds of Facility 17. If necessary, warning tape can be additionally installed to prevent contact. It is also recommended to issue site-wide flyers about the risks of coming in contact with infected areas. Frequent site inspections should be issued between weekly to monthly periods.

3 Behaviour

S-0060 appears to be a sentient wall. Those who walk past it report hearing whispers deep within the wall, regardless of what is on the other side. Other reports have noted the sound of rumbling, turning of metal gears, and distant crying. It appears to change depending on the mood of the observer. Reports have shown that it occasionally delivers motivational auditory messages to people with dejected mental states. A Proposal to use S-0060 as therapy treatment was accepted prior to incident 060-a [See addendum 1] at Facility 17. Due to the nature of incident 060-a a relocation request has been issued. **[CONTAINMENT RELOCATION APPROVED]**

Behavioural Assessment 1 C-8843 was relocated from his holding cell to the infected hallway area S-0060. C-8843 was provided with a sleeping bag and provisions for a week. The following log reports all notable daily activity as observed by Dr. Yates over a period of a week.

[START OF TRANSCRIPT]

[12/04, 12:45] Day 1 C-8843 is planted at the observation site.

[12/05, 02:48] Day 2 Followed by a period of restless sleep. C-8843 wakes up rolls over coming in contact with S-0060

[12/05, 09:34] Day 2 C-8843 demenour has made a noticeable change. C-8843 has become more amicable towards S-0060.

[12/05, 11:57] Day 2 C-8843 begins to whisper to the wall. On-body microphone records a series of pickup lines.

[12/05, 12:12] Day 2 C-8843 from this point onwards shows a hostile demenour towards the researchers.

[12/05, 4:31] Day 2 C-8843 attacks Dr. Yates after making the comment: "This wall is pretty lame." C-8843 is promptly returned to the observation area.

[12/06, 00:12] Day 3 C-8843 begins to initiate coitus with S-0060. His [REDACTED] makes contact with S-0060. C-8843 then assumes a prostrated position. It is at this point he [REDACTED] [REDACTED] [REDACTED]. The experiment is ended promptly.

[END OF TRANSCRIPT]

[FURTHER TESTING APPROVED]

4 Origination

S-0060 is assumed to have come into existence at a random 2 year period between 2098 and 2101. Its anomalous affects seem to increase at a yearly rate, which contributes to the uncertainty of its point of origin. It was first noticed when Dr Shaws noticed a Category C, C-5665, who would often pass the wall, and spend extended periods with the wall during free time. It eventually evolved to physical activity, which was captured on site security tapes. When C-5665 was relocated to a different wing of the facility, she became distraught, and ultimately took her life shortly after. It is presumed that C-5665 had formed a romantic relationship with S-WALL. For this reason, Dr. Yates is not allowed to experiment with the wall to further his research into the Love Device [See [S-0637](#)]

5 Postscript

5.1 Addendum 1

This incident occurred at Facility 17, on November 9th 2103. A cult had formed over a 2 year period within the internal research team of Facility 17. They would secretly hold meetings, against the corporations knowledge, and host mass group events surrounding the wall. These events often included fornication, and extended periods of skin to wall contact. Data shows Facility 17 had initiated the S-0060 therapy program a year prior. The Category C also began to form a cult within their gangs. This eventually resulted in the Category C breach CG9-060 where a host of category C, disrupted their containment in order to attend the "biggest" annual wall worshipping event hosted by the researchers. These activities were discovered when Dr Kim Marsley returned to Facility 17 after a extended break for mental health reasons. She promptly reported site 17 activity to the corporation. Warning tape was placed around S-0060 and all category C and researchers were relocated to nearby Facility 45 for reconditioning. 20% of the affected took their own lives. To prevent this incident from happening again, warning tape must be placed around S-0060 and it must be at least 10mm thick. Annual inspections of Facility 17 are to be had, and reports sent to Head Command.
